

## **Autometrix Precision Cutting Solutions Inc.**

### ***Innovative digitizing, patterning and cutting solutions***

Autometrix provides automated cutting solutions for everything from textiles to composites. We make industry-leading cutting tables, innovative pattern software and mobile pattern digitizers that quickly and easily produce patterns, even for hard-to-fit custom shapes. Our cutting solutions serve manufacturers in a large variety of industries, including manufacturers of awnings and marine canvas, apparel, inflatables, composites, sports equipment, and industrial insulation products to name a few.

Our goal is always to make our customers' jobs easier, saving them time and money with our automated solutions. Machine purchase includes software, installation and on-site training. We provide personal software training prior to system installation. Our customers all over the world consistently maximize their resources, minimize material waste and greatly improve their efficiency.

**PRODUCTS:** Cutting machines: Catalyst, Advantage, Radium and Argon. **Software solutions:** PatternSmith, Pipes 3D, Eclipse, Revolver, Slicer, AutoNesting, Speed Loader and Templates. **Digitizing solutions:** CADShot Mobile and AB Verifier.
