

Strataglass LLC

Superior flexible marine windows

Strataglass LLC has been the worldwide leader in flexible marine window applications for more than 23 years. Its two core products, Strataglass™ and CrystalClear™, are distributed worldwide and used by an extensive list of OEM suppliers and boat builders such as Viking Yachts, Hatteras, Bertram, Ocean Yachts, Riviera Yachts, Grady White and Sea Ray Boats.

Strataglass is a premium flexible clear vinyl sheet engineered to resist scratching, damaging effects from UV and environmental fallout. Strataglass features VueShield™, a highly engineered scratch-resistant coating technology. This proprietary coating makes the product resistant to minor scratches and swirl marks.

CrystalClear uncoated is the clearest, most consistent press polished composite vinyl sheet ever produced. It is engineered using the same painstaking process as Strataglass. The superiority of CrystalClear is immediately obvious to the eye with no hazy blueness, no fish-eye effects, no dimples and no distortions. Offered in 20, 30 and 40 mil (clear and smoked).

In 2015, Herculite Products Inc., the leading innovator in high performance fabrics, acquired Strataglass LLC.

PRODUCTS: Strataglass™ and CrystalClear™.
