Safety Components Fabric Technologies

The trusted leader in textile technology

Safety Components Fabric Technologies Inc. (SCFTI) is a vertically integrated manufacturer of high-performance technical fabrics. It is part of Elevate Textiles, a newly formed collection of top textile companies and brands providing comprehensive global product solutions across many diverse industries focused on innovation, sustainability and heritage craftsmanship.

SCFTI's patented outdoor fabric, WeatherMAX® 80, changed the marine cover market by providing a highly fade-resistant, long-lasting fabric that outperforms acrylic and solution-dyed polyester fabrics. It has proven that a fabric can be strong without weight, breathable yet highly resistant to water, rugged yet still providing the beautiful, rich appearance that today's boater expects. Made from solution-dyed SaturaMax yarns, WeatherMAX® 80 is light and easy to handle, dimensionally stable and strong, and now has the game-changing new HydroMax+ finish for water repellency. Ideal for bimini tops, mooring and playpen covers, trailerable covers and other applications that are subject to prolonged sun exposure.

Patent-pending WeatherMAX 3D provides many of the same protective characteristics of WeatherMAX 80 but with elasticity for hard-to-fit shapes and contoured shades. SCFTI also manufactures technical fabrics for firefighter turnout gear, soft armor, air bags and other demanding end products.
