

Stimpson

Stainless steel 24-line plain & screw stud snaps from Stimpson®

Designed for demanding industrial applications, Stimpson® 24-Line Plain & Screw Stud Snap Sets provide superior snap action and connection strength. Stimpson's low-profile plain stud snaps for cloth-to-cloth applications are available in marine-grade stainless steel, nickel-plated brass, or brass with a matte black finish designed to reflect minimal light.

Stainless steel screw stud snaps are available in $\frac{3}{8}$ " or $\frac{5}{8}$ " lengths and feature a Phillips head screw for easy installation for cloth-to-surface applications. Set Stimpson snap sets quickly, securely and on-the-go with our new modular snap set hand-drive tooling, or use the same tooling in the iconic 405 Bench Press.

EasySet Grommets & Washers

Stimpson's EasySet rolled rim grommets and spur washers are made from light gauge stainless steel to coil with the ease of brass while providing the corrosion resistance of stainless steel and the superior hole reinforcement that industry professionals expect from Stimpson fasteners.

Shop Online: Purchase marine fasteners, including snap sets and EasySet grommets and washers, from Stimpson's official webstore at webstore.Stimpson.com, where any order placed before 3 PM ET ships the same day!
